Classes

Kim McBrien Evans

Bums and Bellies: Sweater Shaping for Your Body: Using your measurements and worksheets, we'll look at how to master the fit of sweater patterns to YOUR body, and what those modifications look like in a simplified form.

Boob Camp: Bust Darts for Every Body: Learn life changing techniques for those of us with larger chests. Sweaters look best when they fit us in our shoulders and properly accommodate our chest. Bring your yarn, your needles and learn how to choose a size and to construct 2 types of bust darts for your chest, giving you endless choice for modifying any sweater pattern.

I Hate Seaming: a Seaming Class for the Rest of Us: Do you hate seaming? Me too. Or do I? Garments with seams have more structure, more stability, last longer and withstand the wear and tear of everyday life. But seaming often feels like that onerous task that we loathe to do and avoid at all costs. Not anymore! Let me show you how to set yourself for seaming success.

Breaking the Rules: Building Unique Shawl Shapes: Contemporary shawls build on tradition, yet defy it openly. Shawls are for all genders and all sizes and are limited only by your imagination. Take what you know about traditional shapes and learn to bend, twist and break those shawl recipes. Learn how to manipulate shape for depth, for length and for colour and stitch play to start creating unique shawls just for you.

Patty Lyons

Knitting ER: We'll learn how to read your knitting and master the basics that every knitter needs to know, how to unknit, how to pick up a dropped stitch in stockinette, how to fix garter, how to fix a mistake in a stitch pattern such as rib or seed, and how to fix your stitch mounts to avoid twisted stitches. We'll also learn a few fancy tricks like picking up a dropped stitch at the end of your row or using a small needle to safely rip down to. Everyone makes mistakes; now learn that it doesn't have to ruin your knitting!

Knitting Bag of Tricks: Learn how to spice up any sweater with your own stitches. We'll start with an exploration of what cables and lace do to your fabric. We'll look at what can make the cast on edge undulate or the side of a stitch move in and out. Next we'll learn the simple math to insert or replace a stitch panel or detail into existing sweater pattern. Then, after looking at swatches, stitch dictionaries and finished objects for inspiration, I'll set you on your path to start to play with adjusting and combining to create your custom stitches. After the class you'll be set for using both graph paper and some imaginative three-dimensional tools to start to lay out your own stitch and even start to swatch it.

Combination Knitting: Have you tried learning continental, but the purl messes you up? Do you feel like you often have uneven tension? Do you have rowing out (your purl row is taller than your knit row). Or perhaps you are already a combination knitter and you've ever been told you knit "wrong", or been asked "what are you doing", take heart . . . there are no wrong ways to knit as long as we control our stitches. A combination knitter works through the back loop to knit, and the front loop to purl. It can be a fast and easy way to knit, but simple adjustments must be made to follow Western patterns, like how to knit in the round, and understand left and right slanting increases and decreases, and how to work twisted pattern stitches. If you are a Western knitter, then learn the amazing advantages to this knitting methods and how and when you would combine it with your own. If you are a Combination Knitter, learn how to make stitches better and easier for your style.

25 Tips for Better Knitting (all-day): Enjoy your knitting more and improve your finished projects! In this fun, fast-paced class Edie will show you tricks to better understand your knitting, avoid frustration, prevent mistakes, and save both time and money. Sometimes we don't know what we don't know, especially as beginning and intermediate knitters. This class features techniques to help grow your skills and provides resources for you to continue that exploration after class.

Unlearn to Knit: You learned the rules: Put your needle in this way, wrap your yarn that way. Now unlearn those rules to gain control of your knitting. No matter how long you've been knitting or what your knitting style, understanding the structure of the knitted fabric and how the stitches are related to one another is the key to becoming an expert knitter. We'll have fun exploring what it really means to take a length of string and turn it into a fabric. If time allows, we'll even "knit back backwards"! You'll leave class with the confidence and ability to fix mistakes, take shortcuts, and be the master of your stitches.

Easy Stitches for Impatient Knitters: Bored with stockinette and garter stitch, but too busy for something difficult? Learn these quick-and-easy stitch patterns to keep your interest and allow you to watch the ball game at the same time!

Short Rows Revamped: In this class Keith will teach you how to properly work short rows using two different colors or yarn to create 1 of 24 squares that combined turn into a beautiful afghan called "The Lizard Ridge." Learn how short rows build your knitting and where to use them in different projects. Disclaimer: Once started, this project will be hard to put down. Be prepared for addiction, laughter and bursts of color!

Keith's Mind Blowing Tips & Tricks: Is the first stitch of your knitting loose? Do you cast on a new project in both knit and purl? Do you hem the bottom of your knitting? Is your bind off uneven when knitting in the round? Is there a magical loose bind off? How much yarn do you need for the long tail cast on? Why aren't my stitches even? What is the proper way to measure? Should I slip the first stitch of every row? Find the answer to these questions and many more!
